SUMMARY

Junior Computer Science student and Full-Stack Software Developer Intern with hands-on experience building responsive web applications using React, Next.js, TypeScript, JavaScript, Tailwind CSS, and Express.js. Experienced in developing UI features, APIs, database integrations, authentication, and technical documentation while collaborating in GitHub-based development teams.

EDUCATION

Bachelor of Science in Computer Science — Anchor University | GPA: 4.56 | Expected Graduation: July 2027

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, C++, C

Frameworks/Libraries: React, Next.js, Express.js, Tailwind CSS

Databases: Supabase, MySQL, PostgreSQL, MongoDB

Development: REST APIs, API Integration, Authentication, Database Design, Responsive Web Development

Tools: Git, GitHub, JIRA, Figma, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer Intern — KevaAI | 2026–Present

- Contributed 100+ Git commits across 20+ feature branches while developing the company's real estate web application.
- Built responsive UI layouts and frontend features using Next.js, TypeScript, React, and Tailwind CSS, translating Figma designs into functional product interfaces.
- Developed APIs and backend endpoints to support application features and data flows, contributing across both frontend and backend implementation.
- Created an internal database schema migration guide documenting migration workflows and conventions used by the engineering team.
- Produced technical documentation for third-party APIs to support integration and future development.
- Collaborated with the engineering team through GitHub, JIRA, Figma, and Consult across feature development, task tracking, and design implementation.

SELECTED PROJECTS

Cara — Full-Stack Fashion E-Commerce | 2026

- Rebuilt the original static Cara template as a full-stack application using Vite, React, TypeScript, and Tailwind CSS with a separate Express + TypeScript server.
- Implemented a responsive shopping experience with product browsing, search, brand/category filtering, sorting, cart totals, checkout validation, and order summaries.
- Designed the Supabase PostgreSQL schema with Row Level Security (RLS), database triggers, and product seeding; implemented an Express order-finalization endpoint.
- Structured the application as a client/server monorepo with reusable components and pages for Home, Shop, Product, Cart, Checkout, Blog, About, and Contact.

University Admission Letter Automation System — Caleb University | 2026

- Built a full-stack system to automate verified admission workflows and the generation and distribution of university admission letters.
- Implemented verified student data intake and dynamic PDF admission-letter generation using templated documents and Puppeteer.
- Built automated email delivery with attachments using Nodemailer and implemented JWT-based authentication.
- Developed an admin analytics and monitoring dashboard to support oversight of admission workflows.

NACOS AUL Web Platform | 2025

- Developed the student portfolio and admin payments dashboard using React, JavaScript, and Tailwind CSS for a platform serving 200+ users.
- Built the payments dashboard to centralize departmental dues management and provide administrators with a structured interface for monitoring student payment records.
- Implemented the student portfolio page to organize and display students' academic and activity information dynamically.
- Integrated frontend components with backend APIs to support dynamic data for payments, SIWES applications, and academic resources.

Appointment Booking Web Application | 2026

- Developed a React-based booking interface with structured user flows and reusable UI components for appointment scheduling.
- Integrated authentication and database functionality to support persistent user accounts and appointment data.
- Implemented state management for booking interactions across the application's user flows.

CERTIFICATION

MikroTik Certified Network Associate (MTCNA) — March 2026
